Summary

I am a very curious individual and I love building web apps because I always learn something new. The whole process and nuances is what excites me.

Some of my hobbies is taking care of my 3 budgies, cooking, baking, investing, building websites, socializing, and teaching and mentoring others.

Experience

Senior Frontend Developer

Cross Country Healthcare

Oct 2022 - Feb 2024 (1 year 5 months)

- Integrate Analytics with Google and Segment Coached and Mentored Junior developers
- Spearheaded implementation of organization-wide coding standards and best practices.
- Implemented automated testing through Jest and Cypress.
- Develop scalable front-end architectures using TypeScript, React, Redux, GraphQL and create visually appealing user interfaces with SCSS and MUI
- Actively participate in agile methodologies on Jira and Confluence
- Pioneered advanced CI/CD pipelines utilizing AWS Amplify and Gitlab CI, automating testing, vulnerability scans, and deployment processes. Achieved a remarkable 30% reduction in delivery time.
- Led the inception and deployment of a cutting-edge job discovery feature, driving a 20% surge in user interaction and fine-tuning job alignment for healthcare professionals.
